Weekly Report

Individual Contributions

Andy

Updated web site - Added page for spring weekly reports (2/7, 4 hours)
- Simplified HTML for weekly report page
- Moved CSS/style code to CSS page
- Created new weekly report page for this spring
- Updated all pages to include link to this new page

Total: 4 hours

Total-To-Date: 51.5 hours

Altay

Modified converter (8 hrs, 2/11)
- Implemented the stopping system for Convert
- Changed the ToXplico class, so it is explicitly used for ending to xplico (no main method)
- Convert now directly sends converted outputs to Xplico and put it into a given session and case
- It has 3 inputs: archive directory, case name, session name
- Having issues with directly connecting to Cream; currently it reads an output file from Cream
- See SVN comments for more details. (Already committed)
